LIVESTOCK

GENERAL CATALOGUE

Main strengths: Separators

Screw treatment
Innovative coating treatment with mixtures of tungsten carbide and metallic matrix which ensures very high hardness and low brittleness.

Screen inspection window
Top inspection window for easy and quick check of screen cleaning.

Front side supported screw
Front bearing structure for a perfect guide of the screw which reduces the wearing on the screen.

Smart Piping input
Inlet piping designed to leave them empty, and avoid the possible freezing, during the inactivity of the machine.

Screens
Stainless steel screens with geometrical structure, strength and material chemical composition specifically designed for each application.

Planetary gearbox
Reduced energy consumption and longer gear life.

Sealing inspection window
Allowing visual check for leakage, and safeguarding the integrity of the gearbox in the event of leakage.

Sealing system
System of three lip seals with grease for a secure sealing between the separator and the gearbox.

**The Best
Choice**

Main strengths: Hygienizing Biocell

Consistent quality

The machine's electronic control system ensures hygienisation of the material through a pasteurization process.

Easy to use

The machine is simple to assemble (install) and easy to use thanks to its "user friendly" control system.

Option of remote control

It is possible to control the operation of the machine from an office PC (temperature, weight, unloaded material, alarms history, etc.).

Financial savings

By balancing the savings obtained from using hygienized solids in the place of traditional bedding (straw, sand, sawdust, etc.) it can easily be verified that returns on the investment are achieved within a few years.

Improved and more economic management of manure

The quantity of manure to be managed is reduced since traditional bedding materials are not present.

Low energy consumption

Maximum power consumption 6,5 kW.

Additional storage is not required

The hygienized solid material is produced daily and so additional storage is not required (in barns) as is the case with traditional bedding materials.

Very compact size

The overall dimensions of the machine are very small compared to competing systems.

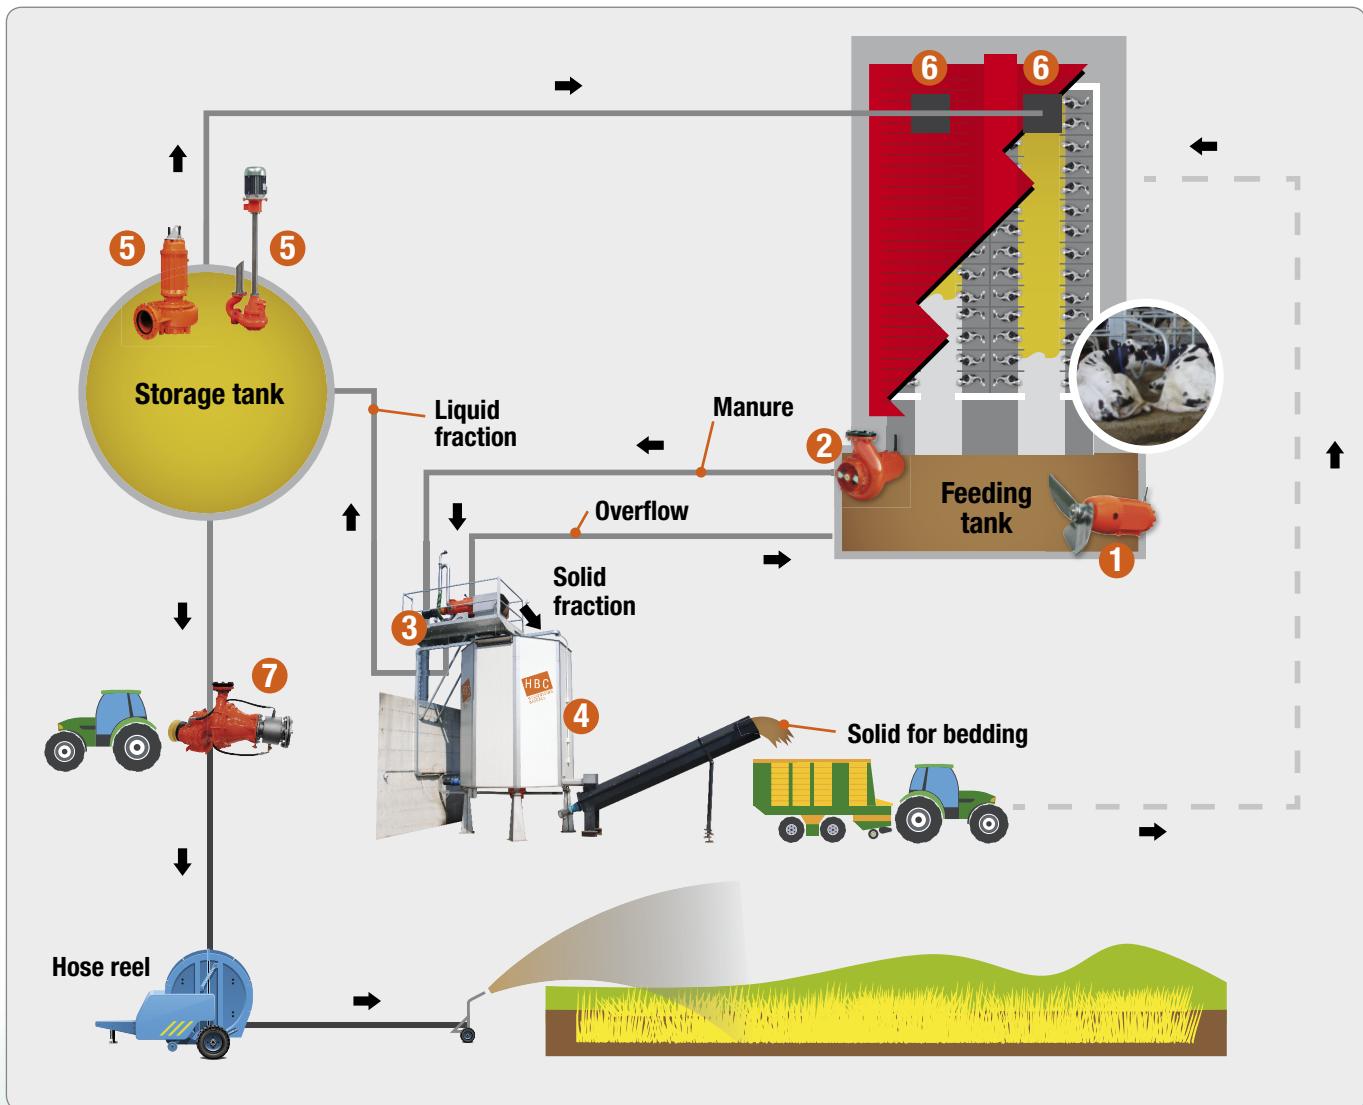

Easy to transport

The machine is modular and so a 20 foot container is sufficient for transport.

Livestock manure management

Application of CRI-MAN products in a typical Livestock

1. TBM mixer to homogenize the manure
2. PTS submersible pump to feed the separator
3. SM separator to divide solid fraction from liquid fraction
4. HBC hygienized biocell for bedding recovery
5. PTE vertical pump or PTS submersible pump for flushing
6. VF flushing valve for flushing
7. PTH pump for tractor

Why to divide solid fraction from liquid fraction?

Benefits of Solid Fraction

- To use as Compost in Greenhouses, Fruit crops, etc.
- To use in the field before seeding because the Nitrogen, present in Organic form in the solid fraction, is slowly absorbed by the ground
- Reduction of methane and odour emissions, due to aerobic stabilization of Solid Fraction
- To use as bedding in the barn (instead of straw)
- Easy and cheap to transport

Benefits of Liquid Fraction

- Can be used for Flushing of barns, channels, etc.
- Can be used for Fertigation in the field
- Volume reduction of the Lagoon for Liquid Fraction recovery (due to the absence of Solid Fraction volume)
- In the Liquid Fraction the Nitrogen is in Ammoniac form, that means fast absorption by the ground. Therefore, it can be used in the field after seeding, during crop growth.
- Reduction of Ammoniac NH3 emission because the Liquid Fraction penetrates in the ground faster
- Can be used in the Nitrogen Removing Plant

Separators

SM260 MINI SERIES

Technical specifications:

- Screw in AISI 304 treated stainless steel
- Standard Screen in AISI 316 stainless steel
- Planetary gear box
- Sealing system with three lip seals (mechanical seal on request)

- Capacity: 4,5 - 18 m³/h 20 - 79 US gpm
- Rpm: 20 (50Hz) 24 (60Hz)
- Motor power: 3 kW 4 HP
- Screen mesh: 0,25 - 1 mm 0,01 - 0,04 inches
- Up to 30% Dry Matter

For farms up to 300 cows

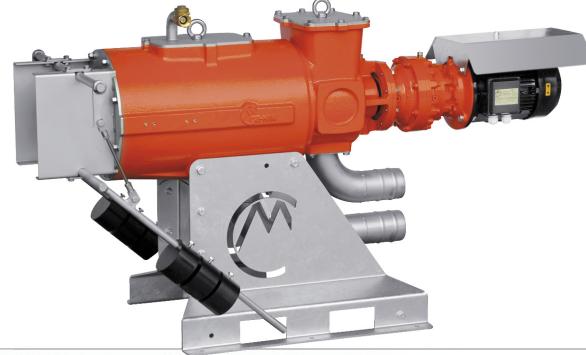

SM260 BASIC SERIES

Technical specifications:

- Screw in AISI 304 treated stainless steel
- Standard Screen in AISI 316 stainless steel
- Planetary gear box
- Sealing system with three lip seals (mechanical seal on request)

- Capacity: 4 - 50 m³/h 18 - 220 US gpm
- Rpm: 33 (50Hz) 40 (60Hz)
- Motor power: 4 kW 5,4 HP
- Screen mesh: 0,25 - 1 mm 0,01 - 0,04 inches
- Up to 30% Dry Matter

For farms from 300 - 800 cows

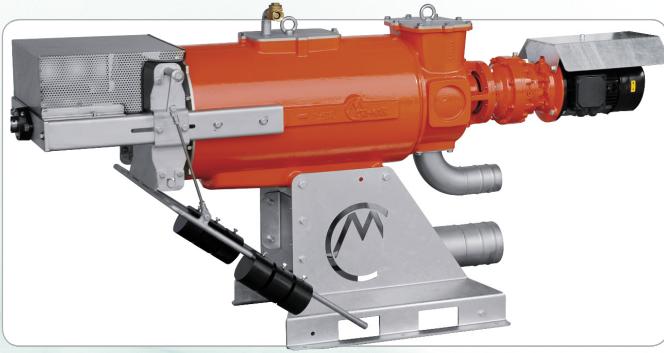

SM260 PROFESSIONAL SERIES

Technical specifications:

- Screw in AISI 304 treated stainless steel
- Front side supported screw
- Standard Screen in AISI 316 stainless steel
- Planetary gear box
- Sealing system with three lip seals (mechanical seal on request)

- Capacity: 4 - 50 m³/h 18 - 220 US gpm
- Rpm: 33 (50Hz) 40 (60Hz)
- Motor power: 4 kW 5,4 HP
- Screen mesh: 0,25 - 1 mm 0,01 - 0,04 inches
- Up to 30% Dry Matter

For farms from 700 - 1200 cows and Biogas Plant.

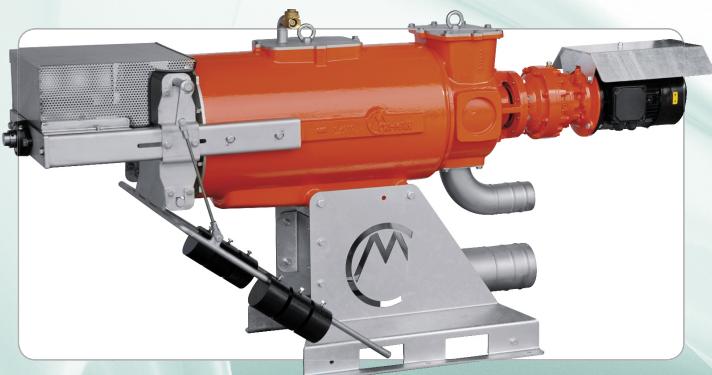

SM300 PROFESSIONAL SERIES

Technical specifications:

- Screw in AISI 304 treated stainless steel
- Front side supported screw
- Standard Screen in AISI 316 stainless steel (Heavy Duty screen on request)
- Planetary gear box
- Sealing system with three lip seals (mechanical seal on request)

- Capacity: 6 - 72 m³/h 26 - 317 US gpm
- Rpm: 33 (50Hz) 40 (60Hz)
- Motor power: 5,5 kW 7,4 HP
- Screen mesh: 0,25 - 1 mm 0,01 - 0,04 inches
- Up to 30% Dry Matter

For farms over 1000 cows and Biogas Plant

Separators

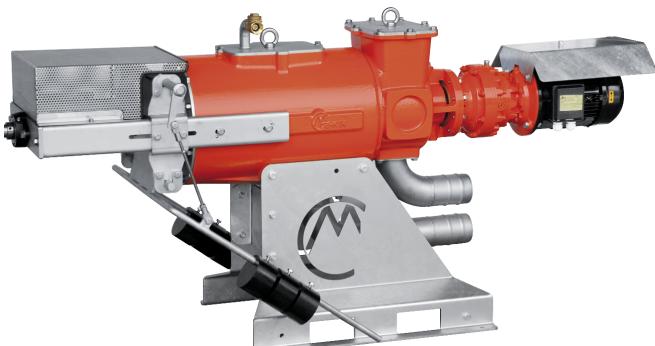

SM260 DM DRY MATTER SERIES

Technical specifications:

- Screw in AISI 304 treated stainless steel
- Front side supported screw
- Heavy Duty Screen in AISI 316 stainless steel
- Planetary gear box
- Sealing system with three lip seals (mechanical seal on request)

- Capacity: 4 - 22 m³/h 18 - 97 US gpm
- Rpm: 14 (50Hz) 17 (60Hz)
- Motor power: 5,5 kW 7,4 HP
- Screen mesh: 0,50 - 1 mm 0,02 - 0,04 inches
- Up to 35% Dry Matter

**Suitable to obtain a drier solid fraction.
For farms up to 400 cows**

SM260FA DM DRY MATTER SERIES

Technical specifications:

- Screw in AISI 304 treated stainless steel
- Front side supported screw
- Heavy Duty main Screen in AISI 316 stainless steel
- Heavy Heavy Duty Auxiliary Screen in AISI 316 stainless steel
- Planetary gear box
- Sealing system with three lip seals (mechanical seal on request)

- Capacity: 4 - 42 m³/h 18 - 185 US gpm
- Rpm: 20 (50Hz) 24 (60Hz)
- Motor power: 7,5 kW 10 HP
- Screen mesh: 0,50 - 0,75 mm 0,02 - 0,03 inches
- Up to 35% Dry Matter

**Suitable to obtain a drier solid fraction.
For farms from 300 - 800 cows**

SM260FA HDM HIGH DRY MATTER SERIES

Technical specifications:

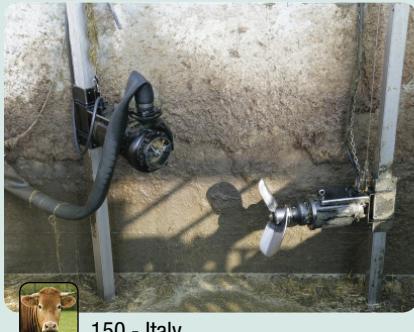

- Screw in AISI 304 treated stainless steel
- New front side supported screw
- Heavy Duty main Screen in AISI 316 stainless steel
- Reinforced Heavy Heavy Duty Auxiliary Screen in AISI 316 stainless steel
- Planetary gear box
- Sealing system with three lip seals (mechanical seal on request)

- Capacity up to 12 m³/h up to 50 US gpm
- Rpm 11 (50Hz) 14 (60Hz)
- Motor power max 11 kW max 15 HP
- Screen mesh 1,00 mm
- Up to 38% Dry Matter

**Suitable to obtain a drier solid fraction.
For farms up to 400 cows**
